RE: Tuition and Fees Policy for Full-time Staff Members

The Department of Computer Science will cover all tuition and fees beyond the standard 3-credit tuition assistance provided by Kansas State University, for up to 4 credit hours of CS department courses per semester, for any full-time staff member in the department. This includes commonly paired courses such as CC 110 and CC 111, provided the total credit hours do not exceed 4. This support does not include costs for books or other required course materials.

To qualify for this assistance, the employee must hold a full-time (0.9 FTE or greater), benefits-eligible position within the Department of Computer Science.
